

NITRAWAL

or the achievement of a partnership between the Walloon Government and the main stakeholders

The Nitrates Action Programme in Wallonia: The PGDA scheme

To cope with the increase in nitrate concentration in groundwater, the Walloon Government adopted the PGDA scheme. This programme is the Walloon implementation of the 1991 Nitrates Directive, which aims to reduce groundwater and surface water pollution by nitrate of agricultural origin.

Nitrawal = the achievement of a partnership between the Government and the main stakeholders:

FARMERS UNION

FWA

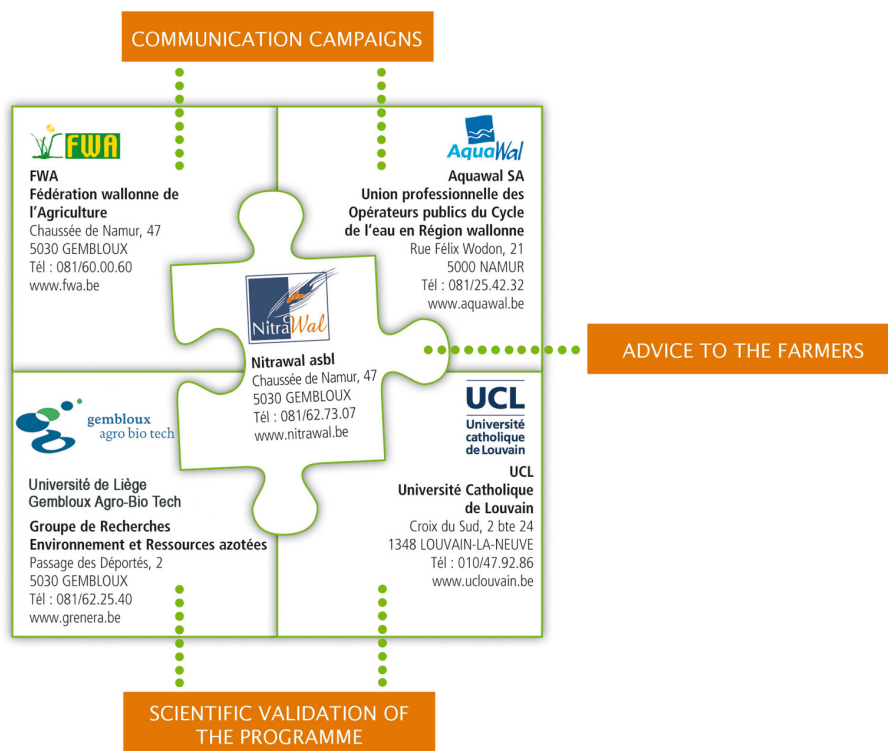

DRINKING WATER PRODUCERS

(public companies)

AQUAWAL

SCIENTISTS

Gembloux Agro-Bio Tech & UCL
